

Anterior Approach Instrumentation

Balancing the Benefits

Since 2001, DePuy has focused its Tissue Sparing Solutions Program on balancing the potential benefits of less invasive techniques — accelerating recovery with less pain — with the goals of optimizing function and maximizing survivorship.

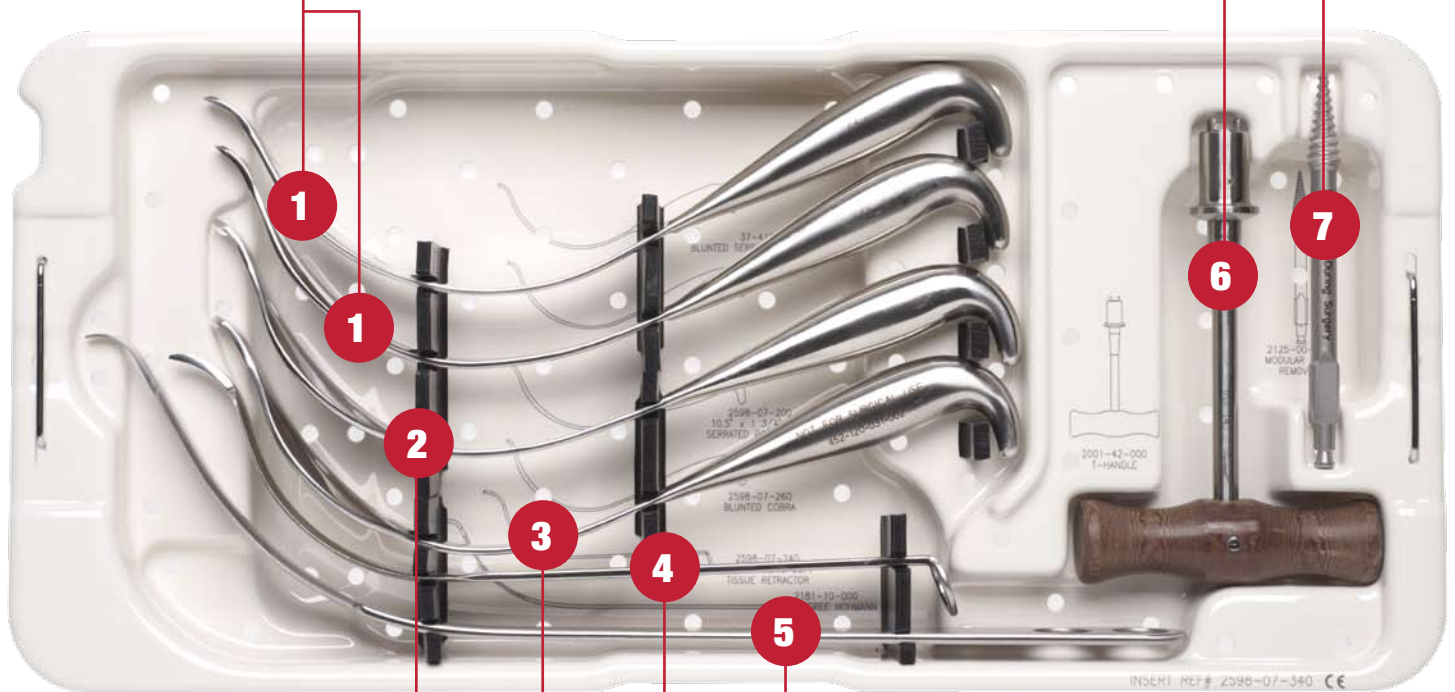

The Anterior Smith-Petersen approach, as described by Joel Matta, M.D., achieves this goal as it is an advanced application of a proven technique first performed by Robert Judet in 1947. The instruments described in this product rationale are designed to facilitate this technique.

TOP TRAY

2125-00-600
Modular Head Ball Remover

37-4106
Blunted Serrated Cobra (2)

2001-42-000
